

ADVANCED BIOFUELS COALITION

MANIFESTO

The Advanced Biofuels Coalition believe that advanced biofuels made from waste and residue-based feedstock represent one of the major industrial opportunities today for our planet in the sustainable transport energy technology field. The world is acting to reduce greenhouse gas emissions and advanced biofuels are a key part of the solution, because they have considerably lower environmental impact than fuels made from petroleum oil or natural gas. Advanced biofuels production is being deployed today and will grow even further and faster now that a policy and regulatory framework enabling long-term investment is on the verge of being implemented.

Members of the Advanced Biofuels Coalition are committed in developing and investing in innovative advanced and environmentally sound advanced biofuel industrial systems bringing the technologies into commercial deployment on a global scale.

The Advanced Biofuels Coalition have set up a common strategy based on several actions aimed at accelerating market penetration and technology deployment and use.

The Advanced Biofuels Coalition speak with a single voice and take a leading position in the field of Advanced Biofuels.

The Advanced Biofuels Coalition address the EU policy institutions, (the European Commission, the Council and the European Parliament), the National Governments and the financial institutions, on issues of common interest.

The Advanced Biofuels Coalition liaise and interface with the other EU related groups in the area of biofuel technology and bioenergy.

The Advanced Biofuels Coalition liaise and interface with international related groups that are pro-active in advocating and developing advanced biofuels.

The Advanced Biofuels Coalition address and close the existing gap in terms of technology representation, appropriate financial instruments, policy development and lack of market incentives both at EU and national level.

The Advanced Biofuels Coalition are determined in stimulating the EU policy towards accelerated industrial research and innovation into emerging biofuel technologies, including new conversion pathways, supported by public and private policies promoting deployment.

The Advanced Biofuels Coalition will be constructive towards existing biofuel associations and other biofuel organisations and will aim to cooperate with them in areas of common interest.

Members of the Advanced Biofuels Coalition must be:

- Technology developers of advanced biofuels who have already been investing in large scale demonstration scale facilities
- Investors in plants (demo or flagship) of advanced biofuels.

Organisations signing this "manifesto" and agreeing to the above issues shall be invited to become members of the Advanced Biofuels Coalition.

The Members of the Advanced Biofuels Coalition are:
